### Procedure:

1. Students work in pairs. If possible, each partner should have a different colored pen or pencil. If this isn't possible, one of them underlines words and the other circles them.

2. Students hunt for verbs in the word search. The word can be forward, backward, up and down or diagonal.

When they find one, they mark it. they must also think of a sentence that contains the word in one of these forms:

*verb verb+ing*  
*verb to verb*

They get one point for each sentence.

3. Teams that finish should put away the paper and see how many of the verbs they can remember.

Here is the solution:

```
+ D + + + + + + + + + + + +
+ I + + + + + + + + E K I L +
+ S + + + + + + + + + + + + +
+ L + + + + + + + + + + + + +
